Professional Summary

Full Stack Developer with production experience building and shipping end-to-end web and mobile applications using TypeScript, React, Next.js, Node.js, MongoDB, PostgreSQL, and AWS. Proven record of reducing latency, architecting distributed systems, managing cloud infrastructure, and delivering client projects from requirements gathering through deployment. Seeking full-time Software Engineering opportunities.

Technical Skills

Languages TypeScript, JavaScript (ES2022+), Python
Frontend React, Next.js, React Native, Tailwind CSS, RTK Query
Backend Node.js, Express.js, FastAPI, Socket.io, BullMQ
Databases MongoDB, PostgreSQL, Redis, Firebase, Supabase
Infrastructure AWS EC2, Docker, VPS, Cloudinary
Tools Prisma ORM, FFmpeg, GraphQL, Git, Vercel AI SDK

Experience

Full Stack Developer

2025 – Present

Cerope

Remote

- Shipped full-stack features across a Next.js frontend and MERN backend, owning work from design through production with zero post-deployment rollbacks.
- Built and maintained a React Native mobile application alongside the web platform, ensuring feature parity across all major releases.
- Introduced Redis caching on high-traffic APIs, reducing response times from **10 seconds to under 200ms** and lowering MongoDB query load by **60%+**.
- Managed production deployments across AWS EC2 and VPS environments while maintaining **99%+ uptime**.

Full Stack Developer

2025

KodeCompiler

Remote

- Built features across a React frontend and Python FastAPI backend for an online coding platform serving hundreds of active users.
- Engineered an in-browser compiler supporting **10+ programming languages** and a LeetCode-style execution engine evaluating **100+ test cases** per submission.

Projects

AVMG

[Live](#) — [Frontend](#) — [Backend](#)

Next.js • Node.js • Redis • BullMQ • FFmpeg • PostgreSQL • Prisma • Supabase

- Architected a distributed media transcoding pipeline using FFmpeg and BullMQ, reducing queue pickup time to **under 500ms**.
- Built Ghost Mode subtitle extraction using yt-dlp's skipDownload flag, reducing transcript overhead from **400MB to under 1MB**.
- Shipped an AI-powered notes generator backed by PostgreSQL and Prisma with a zero-leak ephemeral file lifecycle.

ProjectTeams

[Live](#) — [GitHub](#)

React • Node.js • MongoDB • Socket.io • Vercel AI SDK

- Built a real-time collaboration platform with live chat and document sharing achieving **sub-100ms messaging latency**.
- Integrated Vercel AI SDK for grammar correction and automated content classification.
- Designed a push notification architecture broadcasting updates to all members within **50ms**.

SolarVistar

Private Repository

React • Node.js • MongoDB • PostgreSQL • Prisma • RTK Query • Cloudinary

- Delivered a full freelance CRM for a solar energy company used by **10+ sales personnel**.
- Optimized relational data modelling and reporting workflows, reducing reporting latency to **under 300ms**.
- Implemented RTK Query caching, reducing redundant API traffic by approximately **40%**.

Achievements

- **Hackathon Winner** — **HackJEC 4.0** Built and won with a full-stack mental health platform while competing against 50+ teams under 24-hour constraints.
- **Technical Team Member** — **Karwaan JEC** Contributed to technical initiatives, workshops, and college-wide events as a core member of the technical team.

Education

Bachelor of Technology, Electronics & Communication Engineering

2023 – 2027

Jabalpur Engineering College (JEC), Jabalpur
