EDUCATION

Jabalpur Engineering College

B.Tech in Electronics & Communication Engineering

Jabalpur, India

Expected 2027

Shubham Convent H.S. School

Higher Secondary Certificate (PCM) — 93.8%

Nasrullaganj, India

2022

EXPERIENCE

Code Compiler

Nov 2025 – Present

Full Stack Developer Intern

- Architected a high-performance frontend with React, significantly improving page load speeds and user retention metrics.
- Implemented Docker containerization to standardize development environments and ensure consistent production deployments.
- Resolved critical state management bottlenecks by optimizing data flow patterns, resulting in a measurably smoother user experience.

PROJECTS

AVMG — Media Downloader & Converter [\[Live\]](#) [\[Frontend\]](#) [\[Backend\]](#) *Next.js · Node.js · Redis · AWS EC2* | Mar 2026

- Engineered a full-stack media downloading and conversion application with decoupled Next.js frontend and Node.js backend repositories for clean modularity.
- Integrated a Redis-backed job queue to reliably manage asynchronous media conversion workloads and prevent server bottlenecks under load.
- Provisioned scalable cloud infrastructure on AWS EC2, ensuring high availability and optimised media processing throughput.

Project Teams — Collaboration Platform [\[Live\]](#) [\[GitHub\]](#)

React · Node.js · Socket.io · Vercel AI SDK | Oct 2025

- Built a real-time collaboration engine using Socket.io, enabling instant messaging, live task updates, and presence awareness across teams.
- Integrated Vercel AI SDK to deliver automated, intelligent project summaries and AI-assisted task generation for improved productivity.
- Implemented secure, frictionless user authentication with robust session and data protection mechanisms.

WellNest — Mental Health Support Platform [\[GitHub\]](#)

MERN Stack · Three.js | Aug – Oct 2025

- Engineered an interactive real-time 3D chatbot using Three.js providing immediate, immersive emotional support and enhancing user engagement.
- Implemented JWT-based authentication and a community forum with moderation tools to maintain a safe, supportive peer environment.

Watch This! — AI Movie Recommender [\[Live\]](#) [\[GitHub\]](#)

React · Gemini AI · Firebase · Redux | May – Dec 2025

- Leveraged Gemini AI to process natural language queries and deliver highly personalised, context-aware content recommendations.
- Utilised Redux for global state management, ensuring consistent and predictable data flow across all application layers.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, C++, Python, HTML5, CSS3
Frontend	React.js, Next.js, React Native, Redux, Zustand, Tailwind CSS, Material UI, Three.js
Backend & DB	Node.js, Express.js, PostgreSQL, Prisma, MongoDB, Redis, BullMQ, Socket.IO
Cloud & Tools	AWS EC2, Vercel, Railway, Docker, Git, Supabase, Firebase, Render, Postman
AI & Libraries	Vercel AI SDK, Gemini AI, Zod

ACHIEVEMENTS

- **1st Place — HackJEC 4.0 (2025):** Secured first place among 60+ teams in the SIH internal round at JEC by developing an AI-driven mental health support platform.
- **Finalist — CodeKumbh Hackathon (2025):** Developed a geolocation-based safety solution for tourists, selected as a finalist from a highly competitive national field.
- **Technical Lead — Karwaa.N JEC:** Solely responsible for the full-stack development, deployment, and ongoing maintenance of the official club website.
